Claim Rejections – 35 U.S.C. 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The disclosed invention in Claims 1-15 is inoperative and therefore lacks utility.

The search processing method claimed in claim 1 fails to inputting step for inputting data but merely includes transforming and outputting data that renders the method inoperative.

The disclosed invention in Claims 16 and 17 is inoperative and therefore lacks utility.

The program claimed in claims 16 and 17 fails to include any program code (e.g. JAVA, C++) to enable the program to provide utility.

Claim Rejections – 35 U.S.C. 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 16, 18, "directly or indirectly selected by said user" is vague whether it is a direct or indirect selection. "a following processing key" is not defined and understood.

In claims 1, 16, 18, lines 12-13, "into data to indicate said data" is vague whether they are the same data or different data. Lines 14-15, "specified based on" should be rephrased.
